

THE CITY OF  
SAN DIEGO

# SEWER MAIN REPLACEMENT GROUP 739A PROJECT

## Background

Sewer Group 739A is part of the City of San Diego's continuing annual capital improvement program that replaces old, deteriorated sewer mains within the City's right-of-way. The program also consists of relocating inaccessible sewer mains to the streets, which makes the sewer mains more accessible for maintenance purposes. The sewer mains to be replaced by this project have completed their useful life and replacement is necessary in order to decrease sewer main stoppages and improve the sewage collection systems.

## Project Overview

Sewer Group 739A will replace and/or install approximately 4,226 linear feet of 12-inch diameter and 226 lineal feet of 8-inch diameter sewer mains. The project includes the connection of existing sewer lateral services to the newly installed sewer mains, and street resurfacing.

The limits of construction activities for Sewer Group 739A are concentrated within the following streets: Sunset Cliffs Boulevard from Point Loma Avenue to Guizot Street, Cordova Street from Guizot Street to first alley south of Hill Street, and Hill Street from Cordova Street to the first alley east of Cordova Street. (refer to the location map on the reverse side).

## Construction Schedule

Construction is scheduled to start in October 2011 and is estimated to complete in May 2012.

Traffic control will be provided to continue traffic flow throughout construction. The contractor will also be directed at all times to keep the area as clean as possible from dirt and dust.

Cost of Construction: approximately \$649,000.

## Additional Information

Additional information about this and other important infrastructure projects can be found online at [www.sandiego.gov/engineering-cip](http://www.sandiego.gov/engineering-cip), by calling the public information line at (619) 533-4207, or by sending an email to [engineering@sandiego.gov](mailto:engineering@sandiego.gov).
